

MEF EMC-FILTER 3-PHASE 1-STAGE

I:16A U:3x600 VAC book-style

Current: 16 A 1-stage

Attenuation curves on request.

The MEF 3/1-3/2 3-phase and 1-/2-stage mains suppression filters are used in the 0.1...30 MHz range to suppress conducted interference on mains and supply lines. They are suitable for TN-C networks. The best filter effect is achieved with short connecting lines (recommendation: PE connection < 10 cm) with the largest possible cross sections. Line suppression filters act bidirectionally (in both directions). They reduce symmetrical and asymmetrical interference, which often occurs with frequency converters and switched-mode power supplies.

Packaging unit	1
Electrical data	
Leakage current max.	10 mA @ 250 V AC, 50 Hz
Electrical data Supply	
Power frequency	50 60 Hz
Operating voltage AC max.	600 V
Electrical data Input	
Phase number input	3
Electrical data Output	
Overload current	18× (IN t) max. 0.5 ms; 1.5× (IN t) max. 1 min. (1× per hour)
Installation	
	0.02
Connection cross-section solid min. Connection cross-section solid max.	0,2 mm²
Connection cross-section stranded/fine-	10 mm ²
stranded min.	0,2 mm²
Connection cross-section stranded/fine- stranded max.	6 mm²
AWG number solid min.	24
AWG number solid max.	7
AWG number stranded/fine stranded min.	24
AWG number stranded/fine stranded max.	9
Device protection Electrical	
Duration insulation test voltage	2 s
Insulation test voltage L-L	3,1 kV
Insulation test voltage L-N	3,3 kV
Mechanical data Mounting data	
Mounting method	screwed
Height	250 mm
Width	90 mm
Depth	100 mm
Environmental characteristics Climatic	
Climatic category (EN IEC 60068-1)	25/085/21
Connection type 2	
Connection	Screw terminals SK
Family construction form	terminal
Gender	female
Color contact carrier	gray
No. of poles	3
PIN 1	L1
PIN 2	L2
PIN 3	L3
Connection	Screw terminals SK
