

MOSA M12 female 0° field-wireable (IDC)

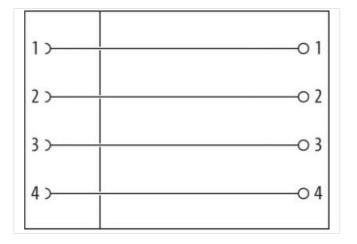

4-pole 0.25...0.5mm²

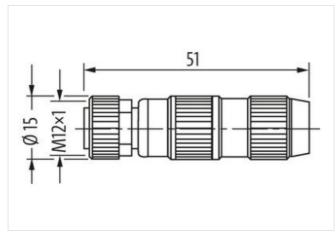

Customized printing and packaging Female straight M12, 4-pole **IDC** terminals Connection cross section: 0.25...0.5 mm² The resistance to aggressive media should be individually tested for your application. Further details on request.

Material screw connection Zinc die-casting Mechanical data Mounting data inserted, screwed, Shaking protection Mounting method inserted, screwed, Shaking protection Clamping range min. 4 mm Clamping range max. 5,1 mm Environmental characteristics Climatic Operating temperature min. Operating temperature min. -25 °C Operating temperature max. 85 °C Important installation notes Protect the connectors by suitable measures from mechanical loads, e.g. by the usage of cable ties. Note on strain relief Protect the connectors by suitable measures from mechanical loads, e.g. by the usage of cable ties. Note on bending radius Attention: Observe the permissible bending radii when laying cables, as the IP protection class can be	Coating of fitting	nickel plated
Mechanical data Mounting data Mounting method inserted, screwed, Shaking protection Clamping range min. 4 mm Clamping range max. 5,1 mm Environmental characteristics Climatic 0 Operating temperature min. -25 °C Operating temperature max. 85 °C Important installation notes Protect the connectors by suitable measures from mechanical loads, e.g. by the usage of cable ties. Note on strain relief Protect the connectors by suitable measures from mechanical loads, e.g. by the usage of cable ties. Note on bending radius Attention: Observe the permissible bending radii when laying cables, as the IP protection class can be	Material gasket	FKM
Mounting method inserted, screwed, Shaking protection Clamping range min. 4 mm Clamping range max. 5,1 mm Environmental characteristics Climatic Clematic Operating temperature min. -25 °C Operating temperature max. 85 °C Important installation notes Protect the connectors by suitable measures from mechanical loads, e.g. by the usage of cable ties. Note on strain relief Protect the connectors by suitable measures from mechanical loads, e.g. by the usage of cable ties. Note on bending radius Attention: Observe the permissible bending radii when laying cables, as the IP protection class can be	Material screw connection	Zinc die-casting
Clamping range min. 4 mm Clamping range max. 5,1 mm Environmental characteristics Climatic Operating temperature min. Operating temperature min. -25 °C Operating temperature max. 85 °C Important installation notes Protect the connectors by suitable measures from mechanical loads, e.g. by the usage of cable ties. Note on strain relief Protect the connectors by suitable measures from mechanical loads, e.g. by the usage of cable ties. Note on bending radius Attention: Observe the permissible bending radii when laying cables, as the IP protection class can be	Mechanical data Mounting data	
Clamping range max. 5,1 mm Environmental characteristics Climatic Operating temperature min. -25 °C Operating temperature max. 85 °C Important installation notes Note on strain relief Protect the connectors by suitable measures from mechanical loads, e.g. by the usage of cable ties. Note on bending radius Attention: Observe the permissible bending radii when laying cables, as the IP protection class can be	Mounting method	inserted, screwed, Shaking protection
Clamping range max. 5,1 mm Environmental characteristics Climatic Operating temperature min. -25 °C Operating temperature max. 85 °C Important installation notes Note on strain relief Protect the connectors by suitable measures from mechanical loads, e.g. by the usage of cable ties. Note on bending radius Attention: Observe the permissible bending radii when laying cables, as the IP protection class can be	Clamping range min.	4 mm
Operating temperature min. -25 °C Operating temperature max. 85 °C Important installation notes Protect the connectors by suitable measures from mechanical loads, e.g. by the usage of cable ties. Note on strain relief Protect the connectors by suitable measures from mechanical loads, e.g. by the usage of cable ties. Note on bending radius Attention: Observe the permissible bending radii when laying cables, as the IP protection class can be	Clamping range max.	5,1 mm
Operating temperature max. 85 °C Important installation notes Note on strain relief Protect the connectors by suitable measures from mechanical loads, e.g. by the usage of cable ties. Note on bending radius Attention: Observe the permissible bending radii when laying cables, as the IP protection class can be	Environmental characteristics Climatic	c
Operating temperature max. 85 °C Important installation notes Note on strain relief Protect the connectors by suitable measures from mechanical loads, e.g. by the usage of cable ties. Note on bending radius Attention: Observe the permissible bending radii when laying cables, as the IP protection class can be	Operating temperature min.	-25 °C
Important installation notes Note on strain relief Protect the connectors by suitable measures from mechanical loads, e.g. by the usage of cable ties. Note on bending radius Attention: Observe the permissible bending radii when laying cables, as the IP protection class can be		
Note on strain relief Protect the connectors by suitable measures from mechanical loads, e.g. by the usage of cable ties. Note on bending radius Attention: Observe the permissible bending radii when laying cables, as the IP protection class can be		
Attention: Observe the permissible bending radii when laying cables, as the IP protection class can be	•	Protect the connectors by suitable measures from mechanical loads, e.g. by the usage of cable tics
		Attention: Observe the permissible bending radii when laying cables, as the IP protection class can be
